Vegetation Data Source: RFL/MRC - VRI6621 - Ownership
Base Map Source: TRIM / Terrabits

This map is created from information stored digitally in the BC Geographic Warehouse. The map has been structured to display the Vegetation Resource Inventory (VRI) data. It is intended to assist in the management of forest resources and is not suitable for use as a property survey. Land ownership and boundaries are the Ownership colour the line are for reference purposes only. (Legend revisions June 2014).

4e. ESTIMATED SITE INDEX

It is advisable when available to have second present, e.g. polymorphic=(15)(18). It is denoted by a stem which always has a numerical value. Where the site index is unknown, type Unknown or 0 (denotes) accurate.
