

**FIRE NAME**

R91947 Alkali Lake Holdovers

FIRE SIZE:

various

FIRE STATUS:

Being Held

RESOURCES:

There are currently 21 firefighters and 6 helicopters working on these holdovers from 2018. In addition there is a 14 person Incident Management Team and 4 helicopters shared between these holdover and wildfire R90376.

UPDATES:

Even though the cooler weather and higher humidity have arrived, the crews continue to find holdover hotspots deep in the duff layer. The deep duff is making it difficult to mop up. BCWS anticipates finding these holdovers throughout the summer.

Today, the crews will continue to mop up along the control line and extinguish hot spots as they are found.

The cooler weather and higher humidity is expected to last throughout the week.

Crew member extinguishing hot spots

EVACUATION ALERTS AND ORDERS:

No evacuation alerts or orders are in effect.

FORECAST:

SYNOPSIS: : An upper trough goes through the north today, with a quick upper ridge then building in overnight through the southern regions of the Fire Centre. Temperatures have fallen back to more seasonal values for today through most of the Fire Centre, with the exception being the north which is seeing below seasonal values as a result of an upper low associated with the trough tracking through. Temperatures will remain just below seasonal through most of the Fire Centre for tomorrow as lingering cooler air will be present. Winds will be the bigger story for today, with a strong west/southwesterly gradient setting up over the Fire Centre which starts to slowly drift northeastward overnight maintaining some winds for the north. Winds tomorrow will continue to gradually diminish through the day, with lots of light and variable/default winds likely for the afternoon. Risk of lightning exists for the northeastern corner of the Fire Centre today, then again tomorrow near northern boundaries. Isolated strikes are possible, and will come on the dry'ish side with little precipitation if they do form. **Sunday:** Mainly sunny with cloudy periods in the morning becoming partly sunny in the afternoon. Wind becoming northwest 4-6 km/h. High 13. UV index 3 or moderate

QUESTIONS AND ANSWERS:

Fire Bans and Restrictions in the Cassiar Fire Zone

For more information visit <http://bcfireinfo.for.gov.bc.ca/hprScripts/WildfireNews/DisplayBan.asp?ID=586#CampfireBans> Currently, open burning and campfires are prohibited in the Cassiar Fire Zone.
