

The following information is current as of	24/07/18
Incident name and number	Glenfir (K51256)
Incident Commander	Glen Burgess
Contact information	<p>Information Officer: Noelle Kekula Phone: 250-319-4815 Email: Noelle.kekula@gov.bc.ca Hours: 8:00 a.m. – 8:00 p.m. only</p> <p>Media Contact: Marla Catherall Email: Marla.Catherall@gov.bc.ca Phone: 250 819-4191 Hours: 8:00 a.m. – 8:00 p.m. only</p>
Fire camp	Okanagan Complex Fire Camp
Incident overview	This wildfire is estimated at 32 hectares in size and the BC Wildfire Service has many ground crews, helicopters and skimmers working together to suppress this fire. This wildfire has been producing some smoke due to the ignition of un-burnt fuels that are located in small crevices and steep canyons. No structures are currently threatened.
Weather forecast	<p>Today: Mainly sunny MAX TEMP: 28° to 32° MIN RH: 15% to 30% WINDS: NE-NW 10-20 km/h and NW 20-30 G 45 km/h near Kelowna and Peachland CHANCE OF LIGHTNING or DRY LIGHTNING is zero</p>
Fire behaviour prediction	Potential for increased fire behaviour in all fuel types compared to yesterday if the winds materialize. Expect fire spread to be slope driven unless terrain is less than 30% slope. If winds are as strong as forecast then fire can spread across slope now. Fire spread caused by winds will generally be in a southerly direction. The Garnet valley is currently getting lighter winds than those that occur in the main Okanagan valley. This is expected to continue. RH's will be +/- 10% higher in the Garnet valley.
Challenges	Yesterday, winds proved to be a bit of a challenge to crews, especially in the gully. As a result, helicopters were utilized to preform bucketing action in this area.
Yesterday's achievements	Crews worked at extinguishing hot spots at the bottom side of this wildfire.
Today's objectives	Today, ground crews and air support are continuing to work hard at suppressing hot spots.
