

The following information is current as of	July 31, 2018
Incident name and number	Mount Eneas (K51264)
Incident Commander	Glen Burgess
Contact information	Information Officer: Marla Catherall Email: marla.catherall@gov.bc.ca Phone: 250 819-4191 Hours: 8:00 a.m. – 8:00 p.m. only
Fire camp	Okanagan Complex Fire Camp
Incident overview	Estimated at 1790 hectares in size. 63 personnel and 2 pieces of heavy equipment are on site today. Air support, as required. 6 helicopters are assigned to the complex. Ministry of Transportation and Infrastructure contractors will be danger tree assessing and falling along the Hwy 97 corridor between Peachland and Summerland. This wildfire is classified as under control.
Weather forecast	A strong upper ridge will continue to provide hot and sunny conditions. With this air mass becoming slightly more unstable, there is a 20% risk of an afternoon thunderstorm. Temperatures will be around mid 30's today, and southerly winds will gust up to 40 km/h near Kelowna and 10-20 km/h elsewhere.
Fire behaviour prediction	Winds will remain light and temperature will start to decrease. With the forecast of instability, be prepared for some gusty conditions.
Challenges	The high temperatures and lack of shade continues to challenge ground crews. As a result, the importance of hydration is being emphasized. Slopes are steep and consisting of shale and rock, which makes patrolling a time consuming task.
Yesterday's achievements	Ground crews rerouted their hose lay in order to fill bladder so that they wouldn't have to rely on a water tender. A bladder is a big portable container that holds a large amount of water that crews will pump water out of, to use on the fire line.
Today's objectives	Today's objectives will consist of demobilizing fire equipment where it is no longer needed and extinguishing hot spots that were detected by the drone heat scan.
Other	The Okanagan Complex wildfires will be transitioning to a new incident management team. New contact information for the new fire information phone will be posted on the BC Wildfire Service wildfires of note page once the changeover happens.
<p>Out of Control: Describes a wildfire that is not responding (or only responding on a limited basis) to suppression action, such that the perimeter spread is not being contained.</p> <p>Being Held: indicated that (with the resources currently committed to the fire) sufficient suppression action has been taken that the fire is not likely to spread beyond existing or predetermined boundaries under the prevailing and forecasted conditions.</p> <p>Under Control: The fire has received sufficient suppression action to ensure no further spread of the fire.</p> <p>Out: The fire has been extinguished.</p>
