

White Rock Lake
(K61884)

FIRE SIZE
58,000 hectares (estimate)

FIRE STATUS
Out of Control

This fire was first discovered on Sunday, July 13, 2021 and is approximately 34 kilometres northwest of Vernon.

CONDITIONS:

Environment Canada has issued a special weather statement for the Vernon area. A building ridge of high pressure will result in rising temperatures through the rest of the week. Daytime temperatures near or above 35 degrees are expected with overnight minimum temperatures near or above 18 degrees. The time frame of the hottest weather is today and Saturday.

On Sunday, the ridge is expected to breakdown with strong gusting winds from the south to southwest expected. There will most likely be a significant increase in fire activity Saturday / Sunday with the forecast weather. Heavy equipment and crews are being moved to priority areas on the fire that are expected to be the most challenging along the north, northeast, and east flanks. Rank 2 - 4 fire behaviour is expected today.

TODAY: Sunny and smoky. MAX TEMP: 31C MIN RH: 20% WINDS: Light and variable in the morning becoming SW 15-20 with gusts 30 to 35 in the afternoon.

STRUCTURE PROTECTION:

The structure protection branch consists 143 structure protection personnel from various fire departments. Structure protection personnel are remaining on site overnight tonight to ensure 24-hour coverage for Structure Protection. Two Type 1 Structure Protection Unit (SPU) trailers, seven Type 2 SPU trailer, 20 engines, five mass-water delivery systems, and 16 water tenders are also assigned to the structure protection branch.

Structure protection personnel are prepared to defend Westwold, Falkland, Cedar Hills, Pinaus Lake, and communities along Westside Road, including Okanagan Indian Band IR#1. Structure protection personnel worked through the night and continue today with a roving patrol along Westside Road, prepared to defend threatened neighbourhoods. Every property that is, or has been, at risk from the wildfire has been assessed and triaged. Structure protection is also working in the interface and intermix areas, including rural properties throughout the fire perimeter, where possible to conduct structure protection.

RESOURCES:

Wildland Firefighters – 194 (22 who remained on-site overnight)

Heavy Equipment – 45

Danger tree assessors/fallers – 15

Helicopters – 16 assigned

Incident Management Team

STRUCTURE PROTECTION:

Personnel – 143

Structure Protection Unit Trailers— nine (two Type 1 and seven Type 2)

Equipment – 20 engines, 16 water tenders, and five mass-water delivery systems. Structure protection personnel are remaining on site through the night to provide 24/7 structure protection continuity.

AREA RESTRICTION ORDER:

The BC Wildfire Service has implemented an Area Restriction Order in the vicinity of the White Rock Lake wildfire. The size of the Area Restriction Order reflects the need to protect the public in areas where there are ongoing fire suppression activities. For more information, please review the [White Rock Lake Area Restriction Order](#) information bulletin and [map](#).

OBJECTIVES:

On the west flank, crews and heavy equipment will work on securing the excursion over in the Foley Road area working back towards the Monte-Pratt. Mop-up is occurring on the west side of Douglas Lake Rd and along Grange FSR towards Rock Bluff. Handline is being built in the Monte-Twig area.

On the northern flank, crews successfully utilized planned ignitions to bring the fire to established control lines on August 12 and continued to mop up from this yesterday. Crews will work on establishing containment along Grange FSR to Adelphi Road on the eastern side of the northern finger of the fire perimeter to protect this flank from growing towards Woods Lake. Crews and heavy equipment have completed line on the east side of the finger and were able to successfully establish line across the top towards Paxton Lake and connect to Hwy 97. A unit crew is working in the Ingram Road excursion and moving south to Jimmy FSR. Machine guard is being built from Biancotto Lake south to existing hand guard north of Highway 97. Guard is being constructed in the Paxton Valley by a unit crew and heavy equipment. The fire has not jumped any guards in the Paxton Valley area; however, bucket helicopters were required most of Aug 10 to assist guard construction. Construction on the Martin FSR contingency line was completed on August 11. The potential of a 3km fire break, with a mass water system deployed within, from Pillar Lake northwest is being explored. If feasible, this will act as a large barrier to limit the potential of fire growth towards communities northeast of the fire.

Crews along the southern flank of the fire have completed control lines along the south of the fire perimeter using a combination of Forest Service Roads, lakes, and pre-existing machine guards. Personnel will also be patrolling and, engaging in direct attack, along the fire perimeter. A 50km contingency guard south of the perimeter from Fintry in the east to south of Chapperon Lake in the west is currently being constructed. This will act as a second contingency guard should the fire progress south. Most of Div A is burning rank 1 – 2.

On the east flank, crews and structure protection personnel are working in the Westside Rd area where the fire is close to properties. Where conditions are suitable, crews are continuing along the fire perimeter and direct attacking using water and hand ignitions to tie in lines and secure the perimeter. Line locators are working on a secondary control line from Salmon River FSR to Okanagan Lake. Heavy equipment is working along the northeast tip of Div B to create machine guard where possible and will utilize aircraft to cool the fire above the dozer line construction as required. Yesterday, planned ignitions from Naswhito Creek to Whiteman Creek were mostly hand ignitions as a result of limited visibility from smoke and aircraft being grounded for majority of the day.

Yesterday, crews conducted small scale hand ignitions near Grange FSR to hold fire behaviour.
