

Flat Lake

(C41602)

FIRE SIZE

63, 817 hectares (estimate)

FIRE STATUS

Out of Control

RESOURCES: There are currently 122 firefighters, 40 pieces of equipment, 5 structural protection personnel and there are 13 helicopters for the Northeast complex. Overnight shifts are implemented based on activity needs.

REMINDER:

As changes are made to Evacuation Alerts and Orders and people return to their homes please remember: That the Flat Lake wildfire remains an active wildfire and an active WorkSafeBC site. Smoke will be visible, especially as we move in to another period of hot and dry weather this coming week. Crews, heavy equipment and aviation resources will continue to work in the area. Please drive slowly, give them the space to do their work and stay clear of active worksites. If you have questions or want to talk about the fire please contact the Fire Information Officer. Please do not approach crews on the incident, let them do their work.

CONDITIONS:

A shift in wind direction, warmer temperatures and low relative humidity resulted in the fire being very active on the northern flank of the fire yesterday and into the evening.

OBJECTIVES:

Smokey skies will hinder air operations today. These resources will continue to be utilized when visibility allows.

On the northwestern flank, firefighters are conducting mop up operations along Dog Creek Road, while heavy equipment will continue to work on securing the excursion over the guard by continuing to establish a fuel free guard around this area.

Aircraft has clear skies in this area and will support guard construction with bucketing operations to cool hot spots.

The wildfire did cross our containment line on the northern flank of the fire and is headed in a northwestern direction due the change in wind direction yesterday.

Today efforts will be focused on re-establishing control lines and heavy equipment will begin widening pre-existing roads to the north and east of Moose Valley Park.

FIRE: Flat Lake (C41602) continued...

On the northeastern corner, firefighters will continue to utilize direct attack methods to secure the fire's edge by patrolling and extinguish hot spots from 87 mile to 83 mile.

On the southwestern flank, Firefighters will continue to conduct mop-up operations on the southwest corner and up the west flank to patrol and extinguish any hot spots found.

REMINDER:

The "1100 road" Forest Service Road closure remains in effect. The map and road closure notice is posted on the Fires of Note page.

EVACUATION ALERTS AND ORDERS:

On August 13, 2021 an Evacuation Order was issued by the Cariboo Regional District.

Several alerts remain in place for the [Cariboo Regional District](#) and the [Thompson-Nicola Regional District](#). To see the status of Evacuation Alerts issued by either Regional District please visit their websites. The evaluation of the need for Evacuation Alerts and Orders is consistently monitored and recommendations to down grade Alerts and Orders are made when it is safe to do so.

Young Lake
(C41097)

FIRE SIZE
7,453 hectares (estimate)

FIRE STATUS
Out of Control

RESOURCES: There are currently 21 firefighters, 4 pieces of equipment, and 1 helicopter on site. There are 5 structural protection personnel and there are 13 helicopters available for the Northeast complex. Overnight shifts are implemented based on activity needs.

REMINDER:

Please remember that the Young Lake wildfire remains an active wildfire and an active WorkSafeBC site. Smoke will be visible, especially as we move in to another period of hot and dry weather this coming week. Crews, heavy equipment and aviation resources will continue to work in the area. Please drive slowly, give them the space to do their work and stay clear of active worksites. If you have questions or want to talk about the fire please contact the Fire Information Officer. Please do not approach crews on the incident, let them do their work.

OBJECTIVES:

The fire size was updated due to better mapping and not because of fire activity.

Yesterday, there was increased fire behaviour on the interior portions of the fire yesterday due to the warmer weather and elevated winds. There continues to be no growth beyond containment lines. The fire activity did burn out fuels on its own and helped further secure lines.

Today, firefighters will continue with patrols and mop up operations on the northern and eastern edge of the fire.

A helicopter will be on site to cool hotspots as required.

Churn Creek
(C21250)

FIRE SIZE
9,411 hectares (estimate)

FIRE STATUS
Out of Control

OBJECTIVES:

A heavy equipment task force team will focus efforts today on the northern flank by widening the fuel free area along pre-existing roads moving east to west.

The photo from Aug. 13 illustrates how the fire is moving in a westerly direction .

WEATHER OUTLOOK

REMINDER:

Hot and dry conditions have arrived. Fire activity is expected to pick back up as fuels dry out with the anticipated warming and drying trend.

TODAY:

Expected to be the warmest day with temperatures in the low to mid 30's.

OUTLOOK:

With the ridge drifting off to the east on Saturday we are still expecting a mainly sunny hot dry day, however some afternoon cloud may result in slightly cooler temperatures. Winds on Saturday are anticipated to increase. Sunday, there will be increasing cloud and winds with some convection expected.

Spot a wildfire, smoke or illegal fire activity? Call 1 800 663-5555 or *5555 on your cellphone.
