

Flat Lake

(C41602)

FIRE SIZE

68,551 hectares (estimate)

FIRE STATUS

Out of Control

RESOURCES:

There are currently 128 firefighters, 57 pieces of equipment, 5 structural protection personnel and there are 13 helicopters for the Northeast complex. Overnight shifts are implemented based on activity needs.

REMINDER:

As changes are made to Evacuation Alerts and Orders and people return to their homes please remember: That the Flat Lake wildfire remains an active wildfire and an active WorkSafeBC site. Smoke will be visible. Crews, heavy equipment and aviation resources will continue to work in the area. Please drive slowly, give them the space to do their work and stay clear of active worksites. If you have questions or want to talk about the fire please contact the Fire Information Officer. Please do not approach crews on the incident, let them do their work.

CONDITIONS:

Danger tree assessments and falling will occur again today to ensure it is safe for personnel to work.

OBJECTIVES:

NORTHWESTERN FLANK

Heavy equipment has constructed a fuel free guard along the west flank of the excursion and today will focus efforts on widening this newly built control line and pre-existing roads to further the secure the area. Due to north/northwest winds, the fire did spot over the guard on the southwestern portion of the line. It is burning back into the fire but heavy equipment will wrap with a fuel free guard to ensure there no further growth.

Firefighters are setting up water delivery systems and conducting mop up operations as the line is being widened. Once systems are setup and if conditions are suitable, small scale hand ignitions will occur tight to the line to remove unburned fuels to further secure this line.

FIRE: Flat Lake (C41602) continued...

NORTH FLANK CONT.

The wildfire did cross our containment lines and is headed in a northwestern direction due the change in wind direction on Aug. 13. The wildfire activity was dampened by the conditions seen over the fire yesterday.

Skimmers worked along the north side of Moose Valley Park while heavy equipment completed a fuel free guard along the west flank of the excursion. Firefighters will setup a water delivery along this line and conduct mop up operations up to 50 feet. If fire behaviour allows, heavy equipment will utilize direct attack methods on the north side of the excursion along the fire perimeter.

Skimmer support on the northern flank on Aug 17.

The 1100 road up to the 37 kilometre has been widened and efforts are now focused on the Helena Lake North FSR located to the northeast of Moose Valley Park.

Firefighters will continue to clean up the line near Holden Lake by conducting mop up operations along the perimeter of the fire.

NORTHEAST FLANK

Firefighters will continue to utilize direct attack methods to secure the fire's edge up to 100 feet by patrolling and extinguish hot spots from 87 mile to 83 mile prioritizing areas near properties. These efforts will also occur on the northeastern corner.

Military establishing a handline on Aug 17.

FIRE: Flat Lake (C41602) continued...

REMINDER:

The “1100 road” Forest Service Road closure remains in effect. The map and road closure notice is posted on the Fires of Note page.

EVACUATION ALERTS AND ORDERS:

THERE HAS BEEN **NO** EVACUATION RECOMMENDATIONS MADE TO THE DISTRICT OF 100 MILE.

On August 14, 2021 the Evacuation Order for the Moose Valley area was expanded by the Cariboo Regional District and an additional Evacuation Alert was issued to the north of the order.

Several alerts remain in place for the [Cariboo Regional District](#) and the [Thompson-Nicola Regional District](#). To see the status of Evacuation Alerts issued by either Regional District please visit their websites. The evaluation of the need for Evacuation Alerts and Orders is consistently monitored and recommendations to down grade Alerts and Orders are made when it is safe to do so.

Young Lake
(C41097)

FIRE SIZE
7,453 hectares (estimate)

FIRE STATUS
Out of Control

RESOURCES:

There are currently 18 firefighters, 4 pieces of equipment, and 1 helicopter on site. There are 5 structural protection personnel and there are 13 helicopters available for the Northeast complex. Overnight shifts are implemented based on activity needs.

OBJECTIVES:

A significant amount of rain has led to decreased wildfire behaviour on the incident and minimal smokes showing within the perimeter of the fire.

Patrol and mop up operations will also occur on the northern and eastern edge of the fire.

Churn Creek
(C41097)

FIRE SIZE
9,411 hectares (estimate)

FIRE STATUS
Out of Control

OBJECTIVES:

A heavy equipment task force team will focus efforts today on the northern flank by widening the fuel free area along pre-existing roads (3100-3100B). They will work from east to west along this road and then move to the western flank to widen the pre-existing road moving from north to south.
