Disclaimer

The fire perimeters for the current fire season, including both active and inactive fires, are supplied from various sources. The data is refreshed from operational systems on a daily basis. The perimeters are the best data available for current fire situation, and therefore should only be used for reference purposes.

The accuracy of the incident is updated when perimeters are flown. Location of individual fire symbols will vary. The information is intended for general reference purposes only. Fire activity is unpredictable because fires are dynamic and circumstances may change quickly. The levels of current fire activity within the mapped fire perimeters can vary widely.
