

GEORGE ROAD (K70804)

The George Road wildfire is 1,390 hectares and is classified as Out of Control.

UPDATE:

On Aug 5, heavy helicopters bucketed on the George Road wildfire to suppress fire activity to the east of Highway 1 and Skuppah 4A. This increase in fire activity on the southeast corner was primarily along a ridgetop and helicopters worked to keep the fire contained along the ridge. Similar fire activity is expected today and helicopters will continue bucketing as priorities within the Complex allow. The southwest corner of the George Road Wildfire is in the proximity of the Skuppah IR #1; fire activity on this corner has been low over the past several days and this area has seen minimal growth. Previously, fire progression was mainly to the north. There are no fire suppression resources assigned solely to this fire and resources will continue to be prioritized throughout the province based on availability and prioritization of incidents.

EVACUATION ORDERS AND ALERTS:

An Evacuation Alert issued by the Skuppah Indian Band remains in effect for this wildfire for Skuppah IR #1, 2A, 4, and 4A.
