CASSIAR/ISKUT/STIKINE LRMP
Archaeological Potential

104G08

ARCHAEOLOGICAL POTENTIAL:

- Lake or Wide River
- Low: AIS recommended to ground-truth model
- Moderate: Reconnaissance recommended
- Moderate to High: AIA recommended
- High: AIA recommended

All areas are considered to have archaeological potential, although to differing degrees.

BASE MAP FEATURES:

- Water Features, Definite
- Water Features, Indefinite
- Swamp
- Gravel Road
- Paved Road
- Railway
- Transmission Line
- Study Area Boundary

OTHER FEATURES:

- Surveyed Area – Reconnaissance (R)
- Surveyed Area – Intensive (I)
- Trail
- Biogeoclimatic Zone Boundary

MANAGEMENT RECOMMENDATIONS:

Although we are confident in the results of the modelling process, we recognize that modelling and heritage resource management is an ongoing process that must incorporate both further archaeological study and First Nations' consultation. The level of effort appropriate for archaeological study should be negotiated between First Nations, the Archaeology Branch, and the client. The level of effort associated with zones of potential constitutes a recommendation. Management decisions should be made with reference to the accompanying report, "Archaeological Overview Assessment of the Cassiar-Iskut-Stikine LRMP", Millennia Research Limited.
