

NOTICE OF INTENT TO TREAT

Ministry of Forests, Lands, Natural Resource Operations and Rural Development (FLNRORD) Kootenay Boundary Region, is planning to aerially treat up to 10,182 hectares of western hemlock forest to reduce the populations of the western hemlock looper (*Lambdina fiscellaria lugubrosa*).

Depending on weather, the biological insecticide Foray 48B (*Bacillus thuringiensis* var. *kurstaki*) will be applied by rotary-wing aircraft once on or around June 5 to July 30, 2021.

The proposed treatment blocks are located in the Revelstoke Timber Supply Area (TSA), within the Selkirk Forest District, north of Revelstoke along Revelstoke Lake from Downie Arm to Kinbasket Lake.

All sites proposed for treatment are covered by the Southern Interior Area Forest Health Program PMP # 2007-2021-4, confirmation #402-0672-17/22. The PMP and maps of the treatment areas may be viewed at:
