All Woodlot Licensees

Dear Licensee:

This letter outlines current changes to the Central Cariboo Forest District's requirements and procedures for Blanket Salvage Permit (BSP) issuance.

In order to allow Woodlot Licensees the flexibility to aggressively address salvage situations, applications for blanket salvage permits will be accepted for the **entire woodlot**.

If you currently do not have an active BSP (CP SE) you must complete 2 steps to obtain an authority to conduct salvage operations.

Step 1

- 1a) Submit a Stumpage Rate Request Form. Volume estimates are not required, however the Annual Allowable Cut (AAC) volume and any Uplift volume is required. See the attached form as an example.

Step 2

To issue a harvest authority or letter permit/exemption, the following is required.

A **paper only** submission and letter permit exemption/authority application will be accepted for salvage areas where no free growing obligations are generated.

- 2a) For applications under the Forest Practices Code (this will apply to licensees with an active Forest Development Plan (FDP)) go to the File Transfer Protocol (FTP) site, use Option 1, 2 or 4 which ever applies to your harvesting application.

OR

- 2b) for woodlot licensees with a Woodlot License Plan (WLP) choose Option 3 or 4 whichever applies to your harvesting application. These are relatively new applications forms for those harvesting under the Forest and Range Practices Act (FRPA).

All Woodlot Licensees

Complete the appropriate application and attach a paper map showing the intended harvest areas.

If you have an active Blanket Salvage Cutting Permit, you only need to complete Step 2 to obtain a salvage harvest authority.

N.B. If you have neither a FDP nor a WLP, contact the district office to discuss your options.

All forms are on the Woodlot FTP site. –
