All Woodlot Licensees

As a follow-up to the district manager's letter dated December 18, 2015, this letter serves as an additional reminder to ensure woodlot licensees are in compliance with all legislated and license requirements.

For your information, the Federation of BC Woodlot Association (FBCWA) is also taking a proactive approach to ensuring woodlot compliance. The "WL CP Reminder List" that the FBCWA produced is attached and can be used as another checklist to ensure all obligations are addressed. It is also available at www.woodlot.bc.ca.

The following list of items serves as a reminder of key obligations and responsibilities associated with the woodlot licence. Ensuring these items are complete and done correctly can avoid problems or delays in the future and also assists in maintaining the stewardship of the woodlot.

1. approved Woodlot Licence Plan, which includes the required Land Use Objectives amendment;
2. approved Management Plan, which covers all current Schedule A and Schedule B lands;
3. compliance with all silviculture regen delay and free growing obligations - including on the ground and required Reporting Silviculture Updates and Land Status Tracking System (RESULTS) forest cover reporting;
4. compliance with all RESULTS reporting submission requirements (attribute and spatial);
5. compliance with all hazard abatement requirements;
6. compliance with all WASTE submission requirements for all blocks where logging was completed after January 1, 2005, - subject to each woodlot licence replacement date;
7. blocks submitted to FTA and RESULTS for all salvage logged areas that created a contiguous clearcut of 1 ha or greater;
8. intermediate cutting surveys submitted for all logged areas 0.25 ha or greater;
9. all notices (commencement, primary logging complete, and removal complete) submitted for active cutting permits and road permits;
10. all accounts are in good standing;
11. road permit issued over all roads and landings that will be used to haul wood within, to or from a woodlot licence; and

All Woodlot Licensees

12. road use permit(s) issued for all forest service roads used to haul wood from a woodlot licence.

If there are any misunderstandings with these requirements or if you would like to discuss your specific woodlot further, please feel free to contact the Cariboo-Chilcotin Natural Resource District tenure staff and they can assist you.

Sincerely,

Lindsey Wood, RPF
A/Resource Manager
