

Please find below the link to the RESULTS Online or Ezilink data entry flowcharts. Most licensees will use the Online flowchart unless they have purchased the Ezilink software. Please note that these are from 2008 and some things may have slightly changed but should help you get info into RESULTS.

<http://www.for.gov.bc.ca/ftp/DCC/external!/publish/Woodlot%20EFM%20Project%20Products/Business%20Process%20Maps/Final%20as%20of%20June%2030%202008/>

There are 4 RESULTS Online flowcharts and 4 RESULTS Ezilink flowcharts. One each for:

1. New opening, including Disturbance Activity, and Post Harvest Forest Cover
2. Silviculture Activities
3. Free Growing Forest Cover
4. Free Growing milestone declaration

The first flowchart above is colour-coded for each step which corresponds to a grey tab in RESULTS

- red outline for opening definition including Site Plan (SP) map
- blue outline for stocking standards including SU map
- orange outline for disturbance activity (map optional)
- green outline for post harvest forest cover including FC map

Note: All steps in the first flowchart do not need to be done at one time. They can be done independently, especially the disturbance activity and post harvest forest cover steps.

#### CODE blocks

Follow the “Correction” path for those with only one SU. Input the standards exactly as they appear in your district manager approved paper site plan. For blocks with more than one SU, an ESF submission is required (ie. online data entry not possible) – the standards still need to match the approved paper site plan.

Please remember that all cutting permits issued prior to approval of your Woodlot Licence Plan are Code cutting permits with paper site plans approved by the district manager. In order to amend any of these plans, a paper amendment should be submitted for review and approval prior to making any changes in RESULTS.

#### FRPA blocks

If default stocking standards were approved in your WLP, then you will need to use the “Reference Guide For FDP Stocking Standards” located on the Forest Practices Branch Site at the weblink below. Page down to “Stocking Standards” (middle of page). Open the Excel document and click the “Cariboo” tab along the bottom. The ID's are listed in the document by BEC and site series. We are pretty sure they can also be found in RESULTS by searching by BEC and Site Series. For blocks with more than one SU, an ESF submission is required (ie. online data entry not possible) – stocking standards ids can still be used.

<https://www2.gov.bc.ca/gov/content/industry/forestry/managing-our-forest-resources/silviculture/stocking-standards>

If alternate stocking standards were approved in your WLP, please contact Stephanie Mooney for further direction.
