

## Woodlot expired CPs backlog WASTE Process

(where waste disposal was completed prior to WASTE assessment)

For active CPs or for non-disposed waste and/or cold decks of expired CPs, waste surveys are to be conducted as per Waste Manual Requirements.

[Waste Manual](#)

As of April 1, 2022, oculars are no longer allowed for backlog waste. New procedures exist as per above link to Waste Manual.

If backlog waste can't be done using the new survey procedures, then the district average process is to be followed. Provincial guidance on submitting district averages is available at [Guidance on Submitting District Averages into the Waste system](#). The district averages to be used as of April 1, 2022, are found at [Interior District Averages](#) - page down until find link to "Interior District Averages Waste Volumes (PDF)". Please note that these change annually. A calculator spreadsheet template with instructions is available on our DCC Woodlot ftp site under [Woodlot Data Integrity](#).

Contact Joshua Wikene [Joshua.Wikene@gov.bc.ca](mailto:Joshua.Wikene@gov.bc.ca) for assistance.

### Tips:

Submit waste information as a "cutblock" survey (instead of ocular)

Enter current date for waste survey

Enter actual primary logging complete date

Enter actual hectares logged

Years Logged is limited to a 12 month period (if logging occurred for more than a 12 month period, start with primary logging complete date and work backwards to start date)

Include each species on HBS reports that fall within each 12 month period (because Tab Rates has individual stumpage rates for each species)

Include "Backlog Waste" & "District Averages Used" in comments

Enter all other required information

Have submission signed by a forest professional (attach letter signed by a forest professional, if submitter is not a forest professional)
