\* Denotes Mandatory Information for Corporate Bridge Register rating is reduced to 30 tonnes. The cribs and pier are 27 years old and past due for replacement. That said a short term fix would be to replace each of the top logs in the abutments and pier to reestablish an industrial load rating with the longer term plan being a complete replacement. Post updated load rating signs, bridge ahead signs, FS1337B HEG Oct. 18, 2010 and replace the missing delineator. Monitor the debris accumulations at the inlet and if required cut them into small pieces so when the river rises they don't get wedged between the bearing points.
