6.1.3 Order for the Recovery of Marbled Murrelet (*Brachyramphus marmoratus*)

The Objectives set for Marbled Murrelet nesting habitat through the Order for the
Recovery of Marbled Murrelet (*Brachyramphus marmoratus*) effective December 2,
2021 are to:

- (1) Maintain Suitable Habitat as follows:

- (a) For each: landscape unit aggregate in the order area:

- Retain all timber in an amount equal to or greater than the minimum habitat
threshold listed in Column “A” in Table 1 in Schedule “7”.

- (b) For each: landscape unit portion in the order area:

- Retain all timber in an amount equal to or greater than the suitable habitat target
listed in Column “A” in Table 2 in Schedule “7”;

- (2) Despite subsection (1)(b), the amount of timber that must be retained within a
landscape unit portion in the West and North Vancouver Island and Southern Mainland
Coast Conservation Regions may be less than the suitable habitat target listed in Column
“A” in Table 2 in Schedule “7”, provided that:

- The amount of timber retained is equal to or greater than the minimum habitat
threshold listed in Column “B” in Table 2 in Schedule “7”.

(3) Despite subsection (1)(a), Suitable Habitat polygons shown in Schedule “1 to 6” in the East Vancouver Island Conservation Region may be harvested, provided that harvesting is required for road access, other infrastructure, or to address safety concerns, where there is no practicable alternative.
