Dear Permittee:

Please be advised that effective January 1, 2008, the Ministry of Forests and Range will be implementing part of the Resource Road Radio Frequency pilot project. All road users will be required to have the proper channels installed for operation on the Eve, Tsitika and Naka Creek Forest Service Roads (FSR). Radio frequencies will be posted at the start of the FSR.

It is recommended that permittees have the full bank of new Resource Road frequencies installed. Industry Canada has sent all radio shops the necessary information to upgrade your radios. The initial frequency for the Eve, Tsitika and Naka FSRs is:

RR-17A frequency – 151.370, tone – 114.8

As this is a pilot project, the initial frequency may change if problems with transmission or reception are encountered.

For more information please view the Ministry of Forests and Range website at http://www.for.gov.bc.ca/dcr/ or the BC Timber Sales website at http://www.for.gov.bc.ca/bcts/areas/TSG.htm or contact Dave Hamilton, Engineering Specialist, BC Timber Sales, Strait of Georgia Business Area, at (250) 286-9346.

Yours truly,

Rory Annett, R.P.F.
District Manager
