

Inspections

Inspections are current only to the date of the inspection.

It is incumbent for anyone planning to use a structure to conduct an inspection prior to any use or planned use to ensure that the user has a complete and current understanding of the condition of any structure.

The Government of BC and its agents except no liability for any decisions or assumptions based on the inspection reports.

The Ministry of Forest welcomes any opportunity to do joint inspections on any of the Ministry of Forest's structures prior to use by any entity that requires the use of those structure and the road system(s) required.

It is reminded that any use of Forest Service Roads requires the permission of the District Manager. This is usually in the form of a Road use Permit which can be obtained from the District Manager for the local Forest District.

Structures are inspected on 1, 2 or 3 year rotation.

Inspection rotation is set by reviewing engineer.

Some sites no longer require inspections, however the inspection report will show last inspection for all sites

List is sorted by Project Number then by Branch Number and then by SiteNumber.

MAPS

Maps are from the available list from 2022/03/10

Map show both Site Number and Structure Number

If only Site Number is shown, the structure has been removed

Maps are geographically located and can be used with Avenza
