Disclaimer:
Rehab parameters for the current fire season, including both active and inactive fires, are supplied from various sources. The data is refreshed from operational systems as frequently as possible, however it may not reflect all the current fire situation, and therefore should only be used for reference purposes.

Wildfire data from the incident is updated when practicable and the occurrence of individual fire updates may vary. This map is produced for internal business purposes only and should not be relied on as accurate for any other purpose. Fire perimeters may change quickly. The levels of current fire activity within the mapped fire perimeters can vary widely.
