Index Map

This map may contain CONFIDENTIAL information: for INTERNAL use only

Disclaimer:
Wildfire perimeters for the current fire season, including the most recent, are mapped hourly from various sources. The data is refreshed from operational systems as frequently as possible. Perimeters may not be final, not current fire situations, and therefore should only be used for reference purposes.

Wildfire data from the incident is updated when practicable and the occurrence of individual fire updates may not be immediately reflected. The data is provided solely and should not be relied on as accurate because fires are dynamic and circumstances may change rapidly. The accuracy of fire data within the fire mapped fire perimeters can vary widely.
