Disclaimer:
Active perimeter for the current fire season, both on active and inactive fires, are supplied from sources. The data is refreshed from operational systems to the public map. Wildfire data may not reflect current fire situation, and therefore should not be used for reference purposes.

Wildfire data from the incident is updated incrementally and the occurrence of individual fire spread is not tracked. The information is intended for general use only and should not be relied on. As conditions are dynamic and circumstances change quickly, the levels of current fire activity are mapped for perimeter can vary widely.
