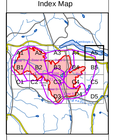
Index Map



This map may contain CONFIDENTIAL information: for INTERNAL use only

Disclaimer:
Rehab boundaries for the current fire season, including both active and inactive fires, are supplied from various sources. The data is refreshed from operational systems on a daily basis. The boundaries are the best available for the current fire situation, and therefore should only be considered approximate.

Wildfire data from the incident is updated when practicable and the occurrence of individual fire systems will vary. The information is intended for general reference purposes only. Fire activity is unpredictable because fires are dynamic and circumstances may change quickly. The levels of current fire activity within the mapped fire perimeters can vary widely.
