Survey Grid Map

82L071 306

Unit: 20

Contract: SU24DTR001

The figure is an aerial map with a grid overlay. The grid lines are labeled with UTM coordinates. The top horizontal axis ranges from 297700 to 299500 in increments of 100. The left vertical axis ranges from 5628000 to 5630900 in increments of 100. The map shows a forested area with a large body of water in the upper left. A yellow outline defines a survey area labeled '82L071 306' and 'SU1 A'. Inside this area, there is a smaller yellow outline labeled 'Swamp'. A red outline on the right side of the map is labeled '82L071 9718'. A legend in the top left corner shows a red square for 'Target Survey Openings' and a yellow square for 'SU/Survey Area'. A scale bar below the legend indicates distances from 0 to 500 meters. A north arrow is also present.

"The opening area and survey area shown in the legend are the GIS identified areas and should be considered definitive as the gross areas. Prior to surveying in the field the survey area is to be checked against RESULTS to confirm the appropriate SU and standards. If the standards in RESULTS are not appropriate, please use the provincial FFT default stocking standards. Roads and other mappable NP (such as NP swamp or rock) that are not yet identified on this map are to be reported in surveys, illustrated on the final map and reported in RESULTS. Non-mappable area is also to be identified in this map table, above, used to net down gross area as appropriate and reported in RESULTS."
