Mr. Steve Paccagnan
President & CEO
Panorama Resort
Panorama, BC V0A 1T0

November 26, 2018

Dear Steve,

On behalf of the homeowners and resident member of the Panorama Subdivision Owners Association, please find this letter in support of Panorama Resort's Wildfire Mitigation FES BC application.

Given the tremendous importance of this program to the safety, security and sustainability of our community, wildfire mitigation must be at the very top of the priority list when it comes to not only resident & public safety but to the continued existence of Panorama Resort as an actual entity.

Surrounded as we are by Crown Land forest, the continued risk of a catastrophic wild fire is never far from a possibility so any mitigation that can be done, should be done and done as soon as possible. The recent years of massive wild fires in BC have pointed out the need for a concerted and concentrated approach to wild fire mitigation in and around Panorama Resort before we face the same fate as many other BC communities that were situated in similar "urban/wilderness interface" situations.

We would urge FES BC to give this application by Panorama Resort a positive & timely response and we look forward to working with Panorama Resort and all of the responsible authorities to ensure that a cost effective and sustainable wild fire mitigation program is put in place and carried out.

Your Truly,

J. Bruce Hamstead
President
Panorama Subdivision Owners Association
