Project Information

Project Title:	Fuel treatment implementation RDCK Area D	Project Country:	Canada
Primary Purpose:	Wildfire Risk Reduction	Project Location - State/Province:	British Columbia
Project Start Date	03/01/2019	Postal Code	V0G 1M0
Project Completion Date	12/31/2019		

Contact Information

Principal Contact Information

Principal Contact Name:	Chris Johnson	City	Nelson
Country	Canada	Postal Code	V1L 7A7
Province	British Columbia	Proponent's Organization	Regional District of Central Kootenay
Contact Email	cjohnson@rdck.bc.ca	Contact Phone	250 354 5343
Contact Address	Box 590, 202 Lakeside Drive		

Project Details

Project Description

Full Proposal Number	
Full Proposal Upload (PDF)	
Region	Kootenay Boundary Region
Resource District	Selkirk District
Management Unit:	TSA 13 Kootenay Lake
Project Site Location:	The proposed work for the Kaslo Treatment Unit is adjacent to the community of Kaslo, on the shore of Kootenay Lake, and in the wildland urban interface, and identified as high hazard in the 2016 Area D. CWPP The proposed work for the Howser Treatment Unit is adjacent to the community of Howser, on the shore of Duncan Lake, and in the wildland urban interface, and identified as high hazard in the 2016 Area D. CWPP The proposed work for the Glacier Treatment Unit is on the East shore of Duncan Lake, and in the wildland urban interface, and identified as high hazard in the 2016 Area D. CWPP

BEC Variant(s):	
Project Description:	Implementation for Kaslo, Glacier and Howser: This project involves post harvest clean up of surface fuel, pruning of some residual trees, thinning reserves patches and hauling small diameter low value material to the Celgar pulp mill to increase fibre utilization and reduce greenhouse emissions. Works completed as part of this project are incremental to tasks normally required of a forest licensee submitting a cutting

	permit. .All treatment units are located in high risk areas as identified in the Area D CWPP, and adjacent to communities.
Project Keyword:	
Attach Additional Information	
Is an existing tenure already in place?	Yes
If no, then please identify the proposed tenures and/or authorities required to complete work.	.
Will your project create a silviculture obligation?	No
If yes, who will hold that obligation?	
Is this project located in the Wildland Urban Interface?	Yes

Project Activities and Objectives

Project Activities	Overstory Removal Fuel Management Treatments Biomass Utilization Thinning
FESBC Purposes	Wildfire risk reduction/mitigation Recovery of fibre (lumber, pulp, pellets, energy, etc.)
Describe how the project will achieve the specified purpose(s).	This project will achieve its specified purposes by recuing the crown closure to 30-40% (BA 12 to 18 m2), retaining fire resistant species, reducing then amount of surface fuel post treatment, hauling low value fibre to the Celgar pulp mill to increase fibre utilization and reduce green house gas emissions. These activities will reduce the conditions for wildfire intensity and protect reduce the wildfire risk to the isolated community.
Identify the repository for the final deliverables	Forest District, RESULTS
Utilization of Wood Fibre	
If applicable, indicate use of removed fibre or non-burning waste management practices.	Small diameter, low value fibre will be harvested, sorted and hauled to Celgar pulp mill in Castlegar. This will reduce the amount of fibre piled and burned and increase fibre utilization.
Describe your plan for residual fibre treatment (e.g. burn, or bulldoze/chip/grind and leave to decay).	Tops and branches and material that cannot be hauled to the pulp mill will be piled and burned on site. Chipping may occur depending on the results of tendering the treatment work
Will the treatment involve broadcast burning to create plantable spots?	No

Work Standards and Development Status

Applicable Work Standards:	General Standards: FS1001 June 2012 LBI Standard Mapping Standards: Ch.6, RESULTS information submission specification - March 2016 Land Based Investment First Nation Information Sharing Guidelines: January 2013 RESULTS Information Submission Specifications: edition 5, June 2018
Has a variance to the above listed standards been requested?	No
If yes, please describe the variance request.	
Where government work standards are not available, please upload an auditable workplan. A template can be downloaded in the application template section above.	
For reference, Ministry Activity Standards can be located at the following URL: http://www2.gov.bc.ca/gov/content/environment/natural-resource-stewardship/land-based-investment/forests-for-tomorrow. You can also find the link in the Information menu.	
First Nations information Sharing:	Information sharing has taken place in 2 ways: first as part of the licensees FSP development and second as part of then completion of the CWPP update for Area E

Development Status:	.
If available, please upload approved prescriptions and treatment maps for this project.	
Will this project (or a part thereof) be tendered?	Yes
If yes, please indicate the % of the project value tendered.	100
Is your company SAFE certified?	No
If you answered no to the above question, please describe how you will ensure safe working conditions for this project.	All contractors will be safe certified
Are any of the activities a legal obligation of a tenure.	No
If yes, then please explain how the project will manage the obligation separate from FESBC funding.	

Alignment with the Land Manager's Priorities.

For utilization projects submitted under Intake 5a, this section is not required.	
Explain how you have engaged with the appropriate government land manager to understand the Land Manager's priorities.	Engagement commenced with the development of the CWPP Update for Area D in 2016. This project aligns with the Land Managers priorities by reducing the wildfire risk to communities while providing fiber to locals mills, increasing utilization by shipping low value material to the local pulp mill and reducing green gas emissions by reducing the amount of debris disposed by burning.
Describe how the project aligns with the Land Manager's strategic planning and/or integrated investment planning.	This project aligns with then land managers strategic and integrated investment through collaboration with local licensees, local government and provincial funding agencies within the wildland urban interface, within priority areas identified through the CWPP completed in 2016.
Describe any feedback or concerns from the Land Manager.	
Attach copies of any correspondence from the Forest District.	District letter of support.pdf

Partnerships

Will this project be receiving funds from another organization?	No
If yes, summarize any contributions from other funding sources, including in-kind contributions.	
If applicable, describe how the project will coordinate with FFT or other initiatives within the Timber Supply Area.	This project is consistent with activities within the TSA.
Describe any partnerships with another organization or agency?	This project is being completed in partnership with BC Rec Sites and Trails and Woodlot 494. Funding is for activities incremental to their legal requirements.
Please upload any correspondence or supporting documentation.	letter of support for john 2018 pdf.pdf
Is this a First Nations Organization?	No
Indicate if this proposal is being submitted on behalf of another organization. If so, then identify the organization and the proposed role of each organization for implementing the project.	This proposal is not being submitted on behalf of another organization.
Indicate if the intended delivery of the project(s) will involve one or more other organizations. If so, then identify the organization(s) and the proposed role of each organization for implementing the project.	The project delivery will not include another organization

Road Construction and Road Upgrades

Road Construction, including Road Upgrades	
Planned Road Construction Length (km)	
Planned Road Construction Width (m; if >20m)	
Biomass removed and burned from ROW (tonnes)	
Road Deactivation	
Will the road be reforested following deactivation?	
Planned Road Deactivation Length (km)	
Planned Road Construction Width (m)	
Please attach road development plan/ deactivation plan/ planting prescriptions
