Golden and Area Emergency Management Program

Re: Kicking Horse Mountain Resort – FESBC Wildfire Risk Reduction Application

Wildland interface fires are a major threat to communities throughout rural British Columbia. The nature of the terrain and fuel load combined with the lack of structural fire protection at KHMR make the community incredibly vulnerable to the threat of wildfire. As the emergency program coordinator for the Town of Golden and CSRD Area A, I support the proposal from KHMR to the Forest Enhancement Society of BC. Forest fire reduction is essential to protecting rural communities and with proper prescriptions will lead to protecting both life and infrastructure from the threat of wildfire.

I am keen to assist in anyway possible to move this forward.

Sincerely

Kyle Hale
