RE: Letter of support for HPCC fuel management planning and operations

The Harrop-Procter Watershed Protection Society (HPWPS) was incorporated in 1996 with a mandate to promote watershed and ecosystem protection in the Harrop-Procter area. As a local environmental organization, HPWPS also promotes environmental education and outreach.

Over the past 20 years the issue of community wildfire protection has gained significantly in prominence among our Society's membership. HPWPS now recognizes that our watersheds and communities are at high risk from catastrophic wildfires, and that wildfire risks need to be addressed in the Harrop-Procter area.

HPWPS fully supports Harrop-Procter Community Co-operative (HPCC) in its ongoing efforts to address wildfire risks in our area, including the development and implementation of fuel reduction prescriptions. HPWPS will partner with HPCC in community engagement and education regarding these important efforts.

Sincerely,

Lloyd Johnson
President, HPWPS
