Yes definitively. I am in full support of your project as it aligns with the land manager's priority as it relates to wildfire risk reduction.

Hi again Julie,

I am working on my FES application.

Any suggestions on how to answer the following?

Describe how the project aligns with the Land Manager's strategic planning and/or integrated investment planning.

Can I say that you support the project?

Thanks, Erik

Excellent!

Phone call might be better.
I am available until 12:30 today and next week I'm on the road and could connect between meetings and travelling.

Consider applying for multiyear (up to 3 years).

Hi Julie,

Yes! I was planning to phone you to discuss. I have been working on a set of FES-funded fuel management prescriptions for a 140 hectare area right above Procter. Maybe 5 treatment units. The prescriptions won't be completed until at least next month, but I am planning to apply for funding to implement the draft prescription for one or two of the units. I'm just waiting on some inventory numbers from the guy who's done my plots, etc. There will be a fibre recovery component--pulp to Celgar.

I've attached a map of the area and a sample photo of the forest type. It was on the slide I showed just 2 minutes after you left on Wednesday!

Should we discuss by phone? What process do you have for this kind of thing?

Thanks, Erik

Thank you Erik for your diligent work on climate change and for the meeting on Wednesday.

Are you considering applying for FESBC funding during this intake which ends next Friday (Nov 30).
You can apply for multi years, for example: year one prescription and year two treatment.

Let me know.

Julie
