Project Information

Project Title:	RDCK Redfish, Woodbury, Kaslo Prescriptions	Project Country:	Canada
Primary Purpose:	Wildfire Risk Reduction	Project Location - State/Province:	British Columbia
Project Start Date	01/01/2019	Postal Code	V1L 5R4
Project Completion Date	06/01/2019		

Contact Information

Principal Contact Information

Principal Contact Name:	Nora Hannon	City	Nelson
Country	Canada	Postal Code	V1L 5R4
Province	British Columbia	Proponent's Organization	Regional District of Central Kootenay
Contact Email	nhannon@rdck.bc.ca	Contact Phone	2503528177
Contact Address	Box 590, 202 Lakeside Drive		

Project Details

Project Description

Full Proposal Number	
Full Proposal Upload (PDF)	
Region	Kootenay Boundary Region
Resource District	Kootenay Lake Forest District
Management Unit:	TFL 55 Selkirk
Project Site Location:	The proposed work at Redfish is adjacent to the community of Balfour on the shore of Kootenay Lake, in the wildland urban interface, in a proposed treatment unit identified in the 2015 Area E CWPP The proposed work is adjacent to the community of Woodbury, on the shore of Kootenay Lake, in the wildland urban interface, in a proposed treatment unit identified in the 2016 Area D CWPP. The proposed work is adjacent to the community of Kaslo, on the shore of Kootenay Lake, in the wildland urban interface, in two proposed treatment units identified in the 2016 Area D CWPP
UTM Zone	
UTM Easting	
UTM Northing	
Location Map and Spatial Data File Attachment	
BEC Variant(s):	
Project Description:	This application is for the prescription development for three treatment units: Redfish, Woodbury and Kaslo2/Kaslo3. All units are in high hazard areas as identified in the CWPP updates for Areas E and D, and adjacent to communities that are very vulnerable to wildfire. These prescriptions would be developed in collaboration with the tenure holders, and inform wildfire risk reduction incremental to licensee obligation. This includes a plan for post harvest clean up of surface fuel, pruning of some residual trees, thinning reserves patches and hauling small diameter low value material to the Celgar pulp mill to increase

	<p>fibre utilization and reduce greenhouse emissions. Letters of support from tenure holders are in place. Each treatment unit has confirmed funding in place from the UBCM SWPI Program, and a community contribution. The requested FESBC contribution would be 16% of the project cost.</p>

Is an existing tenure already in place?	Yes
If no, then please identify the proposed tenures and/or authorities required to complete work.	.
Will your project create a silviculture obligation?	No
If yes, who will hold that obligation?	
Is this project located in the Wildland Urban Interface?	Yes

Project Activities and Objectives

Project Activities	<p>Planning</p> <p>Prescriptions</p>
FESBC Purposes	<p>Wildfire risk reduction/mitigation</p> <p>Recovery of fibre (lumber, pulp, pellets, energy, etc.)</p> <p>Opportunities to attain carbon benefits</p>
Describe how the project will achieve the specified purpose(s).	<p>These prescriptions will develop a prescription that intends to achieve the following at implementation by reducing the crown closure to 30-40% (BA 12 to 18 m2), retaining fire resistant species, reducing then amount of surface fuel post treatment, hauling low value fibre to the Celgar pulp mill to increase fibre utilization and reduce green house gas emissions. These activities will reduce the conditions for wildfire intensity and protect reduce the wildfire risk to the isolated community.</p>
Identify the repository for the final deliverables	<p>Forest District, RESULTS</p>
Utilization of Wood Fibre	
If applicable, indicate use of removed fibre or non-burning waste management practices.	<p>At prescription phase</p>
Describe your plan for residual fibre treatment (e.g. burn, or bulldoze/chip/grind and leave to decay).	<p>At prescription phase</p>
Will the treatment involve broadcast burning to create plantable spots?	No

Work Standards and Development Status

Applicable Work Standards:	<p>General Standards: FS1001 June 2012 LBI Standard Mapping Standards: Ch.6, RESULTS information submission specification - March 2016 Land Based Investment First Nation Information Sharing Guidelines: January 2013 RESULTS Information Submission Specifications: edition 5, June 2018</p>
Has a variance to the above listed standards been requested?	No
If yes, please describe the variance request.	

Where government work standards are not available, please upload an auditable workplan. A template can be downloaded in the application template section above.	
For reference, Ministry Activity Standards can be located at the following URL: http://www2.gov.bc.ca/gov/content/environment/natural-resource-stewardship/land-based-investment/forests-for-tomorrow . You can also find the link in the Information menu.	
First Nations information Sharing:	Information sharing has taken place as part of then completion of the CWPP update for Areas E and D
Development Status:	.
If available, please upload approved prescriptions and treatment maps for this project.	
Will this project (or a part thereof) be tendered?	Yes
If yes, please indicate the % of the project value tendered.	100
Is your company SAFE certified?	Yes
If you answered no to the above question, please describe how you will ensure safe working conditions for this project.	All contractors will be safe certified
Are any of the activities a legal obligation of a tenure.	No
If yes, then please explain how the project will manage the obligation separate from FESBC funding.	

Alignment with the Land Manager's Priorities.

For utilization projects submitted under Intake 5a, this section is not required.	
Explain how you have engaged with the appropriate government land manager to understand the Land Manager's priorities.	Engagement commenced with then development of the CWPP Update for Area E in 2015 and Area D in 2016. This project aligns with the Land Managers priorities by reducing the wildfire risk to communities while providing fibre to locals mills, increasing utilization by shipping low value material to the local pulp mill and reducing green gas emissions by reducing the amount of debris disposed by burning.
Describe how the project aligns with the Land Manager's strategic planning and/or integrated investment planning.	This project aligns with then land managers strategic and integrated investment through collaboration with local licensees, local government and provincial funding agencies within the wildland urban interface, within priority areas identified through the CWPPs completed in 2015 and 2016.
Describe any feedback or concerns from the Land Manager.	Feedback is generally positive and supportive as these landscape projects are some of the first of their kind in this region. No concerns at this time.
Attach copies of any correspondence from the Forest District.	District letter of support.pdf

Partnerships

Will this project be receiving funds from another organization?	Yes
If yes, summarize any contributions from other funding sources, including in-kind contributions.	Redfish, Kaslo 2/Kaslo 3 and Woodbury all have confirmed funding from UBCM SWPI and each electoral area. \$110,250 confirmed contribution from UBCM \$16,444 confirmed community contribution from affected electoral areas.
If applicable, describe how the project will coordinate with FFT or other initiatives within the Timber Supply Area.	This project is consistent with activities within the TSA.
Describe any partnerships with another organization or agency?	

Please upload any correspondence or supporting documentation.	
Is this a First Nations Organization?	No
Indicate if this proposal is being submitted on behalf of another organization. If so, then identify the organization and the proposed role of each organization for implementing the project.	It is not being submitted on behalf of another organization.
Indicate if the intended delivery of the project(s) will involve one or more other organizations. If so, then identify the organization(s) and the proposed role of each organization for implementing the project.	Delivery will not involve other organizations.

Road Construction and Road Upgrades

Road Construction, including Road Upgrades	
Planned Road Construction Length (km)	
Planned Road Construction Width (m; if >20m)	
Biomass removed and burned from ROW (tonnes)	
Road Deactivation	
Will the road be reforested following deactivation?	
Planned Road Deactivation Length (km)	
Planned Road Construction Width (m)	
Please attach road development plan/ deactivation plan/ planting prescriptions
