HARVEST PLAN MAP
CP: 70 Block: 2

Forest License: A30172
Timbermark: FE6070

NAR: 25.5 Ha NET

KALESNIKOFF LUMBER CO. LTD.
"Take Care Of The Land, And The Land Will Take Care of You."

Adjacent Existing Cutblocks
- Harvest boundaries are hung lightly when boundary is obvious along an adjacent existing cutblock
- Immature trees in existing blocks may be destroyed if required for operational or safety constraints

Gas Line
- Do no go on gas line or within 10m with equipment.

Motorized Recreation Trails
- Ignore MFZ on trails if required for operational or safety constraints. MFZ should help identify trail locations in winter.
- Trail Skid crossings are hung with double or triple black and pink striped ribbon on either side of trail.

Private Land
- Do not cross into private land. Some of the private land has minimal buffer. Retain trees near private land if required for operational or safety constraints.

Retention
- Retain Py where feasible within operational or safety constraints.
- Retain other species if needed due to operational or safety constraints.

Wards Ferry Trail
- During falling and skidding operations signage must be posted on either side on the trail before the site warning trail users of the operation and that the trail is closed.
- A spotter on each end of the trail must also be present during falling and skidding operations for the safety of recreationalists that could wander into the operating area.
