93010	481	2016-CLE-0031	22.40				Clearwater	15 CODE 1-4	0 CODE 5-6	LIGHT ATTACK	NO ACTION	TRAP TREES	Polygon 0031 had light scattered attack and low sanitation rating. There will be some flight in 2017, lower risk of spread and sites to the East on opposite side of road going upslope has some very light older attack, no action required. Access is very limited to the west of the river as had difficult times crossing and finiding the right spot.

93010	501	2016-CLE-0051	0.25	Y		1	Clearwater	0 CODE 1-4	0 CODE 5-6	NO ATTACK	NO ACTION		These sites are on both sides of river where difficult to find crossing. Crew walked down river to find crossings and didn't find any activity on way to sites. With the sloped ground to the east, again little signs of attack. Polygon CLE-0072 could not be accessed due to river and length of walking that would be required to access it. No action required in this grouping of sites.

93010	511	2016-CLE-0061	0.25	Y		1	Clearwater	1 CODE 1-4	0 CODE 5-6	LIGHT/MOD ATTACK	TRAP TREES	MONITOR/Polygon	Tyhis grouping is further to the south on the Clearwater and has activity in the sites adjacent to the river and heading east on the other side of the road, Doesn't appear the spread has gone over the hill and is holding alongside road. Could not get across river to assess the west side of river. CLE0066 was on west side of river but noted some attack on way to it.. Options are to have a few trap tree trails but the area is quite steep on both sides of the road and may not be operationally feasible. May want to consider a hybrid probe in area and encompass into polygon. May find light attack and no need for action.
