

FH17DPG218- SUMMARY - TUDYAH A

2 sites in TUDA area, each far away from one another. TUDA had some moderate attack, with 2 code 1 attacked trees found mixed with some old attack code 5's. This site is surrounded by older cutblocks and currently being harvested to the north. There will be minimal chance for beetle to move as now an isolated pocket remains with light scattered attack. TUDA-0002 had no current attack and isolated site with low risk of spread.
