information: for INTERNAL
use only

Disclaimer: Wildlife permits for the current fire season, including both active and inactive fires, are supplied from various sources. The data is refreshed from operational systems nightly to the public map. Wildlife data may not reflect current fire situations and therefore should only be used for reference purposes.

Wildlife data from the incident is updated when practicable and the occurrence of individual fire species may vary. The information is intended for general purposes only and should not be relied on as accurate. Species lists may change and occurrences may change quickly. The level of current fire activity within the mapped fire perimeter can vary widely.
