This map may contain CONFIDENTIAL information; for INTERNAL use only

Disclaimer:
Rehab requirements for the current fire season, including both active and inactive fires, are supplied from various sources. The data is refreshed from operational systems on a daily basis. This map is a snapshot in time of the current fire situation, and therefore should only be used for reference purposes.

Limitations: The incident is updated when practical, however the occurrence of individual fire symbols will vary. The information is intended for general reference purposes only. Accuracy of the data is limited because fires are dynamic and circumstances may change quickly. The levels of current fire activity within the mapped fire perimeters can vary widely.
