This map may contain CONFIDENTIAL information: for INTERNAL use only

Disclaimer:
Wildfire perimeters for the current fire season, including both active and inactive fires, are supplied from various sources. Not all fires are mapped and not all mapped fires are sent to the public map. Wildfire data may not reflect actual fire boundaries and therefore should only be used as a reference source.

Wildfire data, from fire incident is validated when practicable and the occurrence of individual fire updates may be delayed. Wildfire perimeter data is for display purposes only and should not be relied on as accurate because fires are dynamic and circumstances may change rapidly. Fire sizes may change as they settle. For mapped fire perimeters can vary widely.
