

Access:Very Back of the Moberly FSR. Main-line has been deactivated and washed out. Secondary road was sledable to a point. Spur road washed out. Walk 1 m crossing frozen river, or 1 km from closest road. Choose walking route carefully due to steep slopes and cliffs

Operability – Difficult – greater than 45% slopes. Multiple cliffs in block. Portion of block could not be surveyed due to cliffs preventing access. Access will prevent any form of treatment

Resource Management Concerns – Riparian areas that could not be classified due to snow.

Vigour of Beetle population – 70 % of population is on a 2-year cycle

Other Factors – N/A

**Dawson Creek
Sx Beetle Probe**

Date Surveyed: Jan 31, and February 10, 2019
Surveyors: Connor Toop, Aiden Wischniewski
Area Surveyed: 34.4 Ha
Total Walkthrough Distance: 2.61 km
Percent of Walk Line Distance [100m segments] with Live Beetles: 30.6 %
Number Pixels Surveyed: 1
Pixel Data - Attack Percentages by Yr. of Attack:

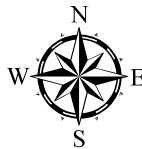

- (2018) 25.55 %
- (2017) 0.00 %
- (2016) 12.78 %

Pixel Data - Percent Spruce: 34.14 %
Sanitation and Salvage Harvest Rate: 981.20
Pixel may have over calculated the infestation with 3 attack trees in the polygon.
Leave as is due to access to this block being very difficult.

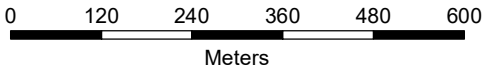

Mapping Date: 2/20/2019

Mapper: Niki Rosenthal
