FH198240003

Date Surveyed: January 21, 22, 2019
Surveyors: Simon Turcotte, Mariska Van Der Stap
Area Surveyed: 117.7 Ha
Total Walkthrough Distance: 11.9 km
Percent of Walk Line Distance [100m segments] with Live Beetles: 3 %
Number Pixels Surveyed: 3
Pixel Data - Attack Percentages by Yr. of Attack:
• (2018) 0.00 %
• (2017) 0.00 %
• (2016) 0.00 %
Pixel Data - Percent Spruce: 76.06 %
Sanitation and Salvage Harvest Rate: 0.00 Monitor

Mapping Date: 1/31/2019
Mapper: Niki Rosenthal
Data Source: BCGW

Scale: 1:10,000

This map is georeferenced
Coordinate System: NAD 1983 BC Environment Albers

Operability – Very steep slopes of 70%-80 percent in areas, in addition to some rock cliffs. Northern portion is mostly flat.

Resource Management Concerns – oil and gas activity in the area. River along the eastern portion of the polygon. In the future a Riparian management area would likely be required.

Vigour of Beetle population – Scattered dead attack, mostly around streams. Few live attack trees, 75% of which are on a 1-year cycle. Higher elevations primarily Sub-alpine fir.

Other Factors – almost 40 % of the spruce trees are 40 cm or greater in diameter. This stand could be at risk in the future, in the lower slopes.
