

Access: South Puggins road 400 m from POC of polygon. Active lease site approximately 150 m from the POC.

Operability – Flat terrain with slight slope to the south east. Small 20X20 m pockets with no trees that are likely wetter.

Resource Management Concerns – Snowmobile trail, 50 m south of polygon.

Vigour of Beetle population – White spruce intermixed with black spruce. Scattered Pine, At and Ac patches. Only a couple of the dead Spruce trees found were from spruce beetle. All other dead had ips, but no galleries that suggest spruce beetle.

Other Factors - Thin bark, most spruce trees less than 30 cm dbh.

Dawson Creek
Sx Beetle Probe

FH198240003
Date Surveyed: January 20, 21, 2019
Surveyors: Connor ~~Topp~~
Area Surveyed: 37.9 Ha
Total Walkthrough Distance: 3.85 km
Percent of Walk Line Distance [100m segments] with Live Beetles: 3 %
Number Pixels Surveyed: 1
Pixel Data - Attack Percentages by Yr. of Attack:

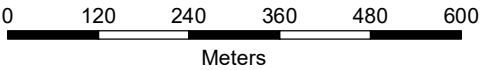

- (2018) 0.00 %
- (2017) 0.00 %
- (2016) 0.00 %

Pixel Data - Percent Spruce: 91.35 %
Sanitation and Salvage Harvest Rate: 0.00
Monitor – Aerial – this stand has some potential for future attack due to the size of the spruce trees.

Mapping Date: 1/31/2019
