FFT Fibre Opportunities

April 28,2021

- Objective of Forest for Tomorrow program is to improve long and mid-term timber supply through planting trees, fertilizing, spacing…
- Targeting to reforest NSR areas caused by fire or MPB(FLTC)
- Partnering with BCTS for low-cost sales where ITSL's advertised by BCTS and FFT covers the silviculture costs.
- Increased cost of planting (Covid19 cost) and social matters (ESI) has resulted in reduction in provincial fibre opportunities.

FLTCs in 2021/22

- DND - Chinook Community Forest 332ha
- DND - Silvicon Services Inc 300ha
- DND - Silvicon Services Inc (for Cheslatta Community Forest) 200Ha
- DVA - District Office 40ha
- DPG - District Office 700ha
- DQU - District Office 250ha
- DCC - District Office 250ha

BCTS/FFT ITSLs

Lakes: expecting around 110,000 m3 in burnt areas

Morice: expecting around 100,000 m3 in burnt areas

Vanderhoof: 70,000 m3 in Crystal south of Vanderhoof (.16 piece size)

Fort St. James: 81,000 m3 North of Fort St. James (.14 piece size)

Total for Quesnel: 372ha -40,564m3

Williams Lake: 2236.4 ha - 153,389m3

Questions/Comments from the last meeting:

- FFT treatment priority ranking – is it adequately considering the economic value of residual fibre
- FFT sales how can we ensure the longest possible window for harvesting (budget, trees on order etc.)
