

Information Required SSS Referrals in BCTS Operating Areas.

The following information must be included before BCTS will consider a SSS referral.

Maps

Include the following:

- ☐ Scale
- ☐ North arrow
- ☐ General Location
- ☐ Mapsheet
- ☐ Infestation centers of proposed harvest area(s)
- ☐ Access
- ☐ Legend to identify any symbols/line work used on the map
- ☐ GPS points if used
- ☐ Highlight adjacency to other openings (i.e. logging)

Text

- ☐ Name, address, contact number and fax number and email
- ☐ Describe exactly what is proposed for salvage.
- ☐ Indicate damage factor (i.e. mountain pine beetle attack, fire salvage etc.
- ☐ Estimate incidental percentage or number of stems to be removed for a) interspersed and b) access to a maximum of 10%.
- ☐ Describe current stand characteristics including species composition with percentage of each species, average height, age, and diameter if applicable
- ☐ Volume and method of harvest
- ☐ Indicate that you have read the SSS Guidelines in BCTS operating areas and this proposal is consistent with it.
- ☐ Indicate date you filed your notice of intent.
- ☐ Provide detailed access description to the area.

Field Location

- ☐ The area(s) applied for should be easily identifiable in the field with two colours of ribbons hung adjacent to the road if located off the road. Ribbons are to be labelled with a reference number that is the same as the one used on the map.
- ☐ SSS areas should be identified with ribbon labelled with a reference number.
- ☐ Access trails (if necessary) should be ribboned.
