<https://www2.gov.bc.ca/gov/content/safety/wildfire-status/about-bcws/wildfire-history/wildfire-season-summary>

Above average starts below average hectares burned.

Slow start, prolonged season.

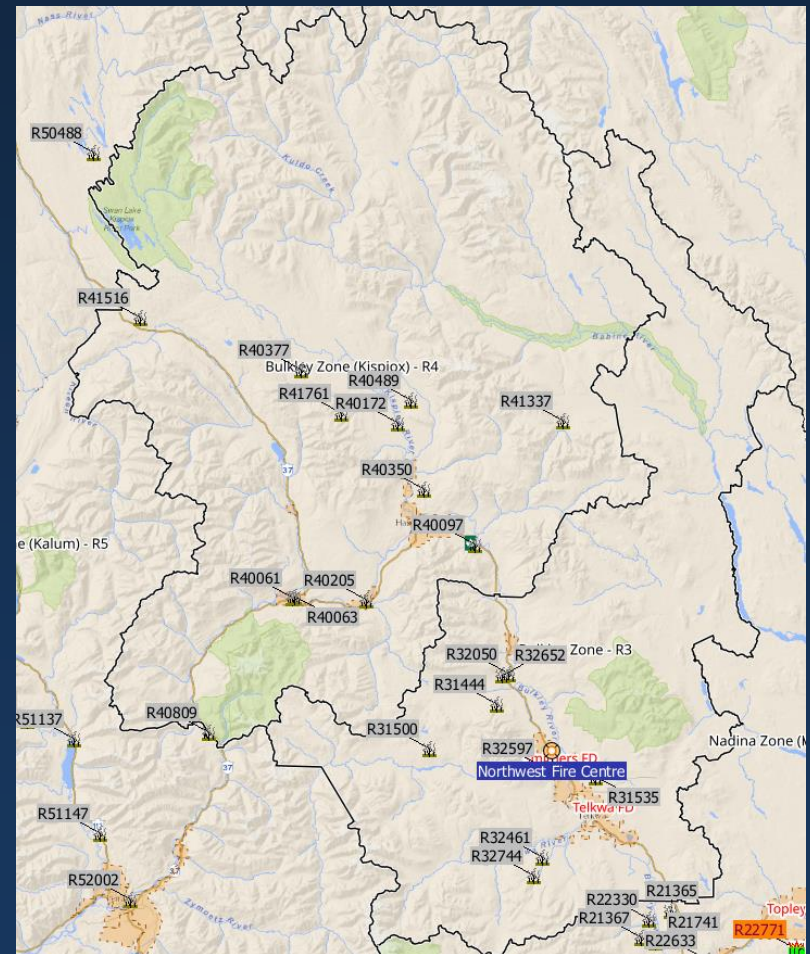

Provincial Picture

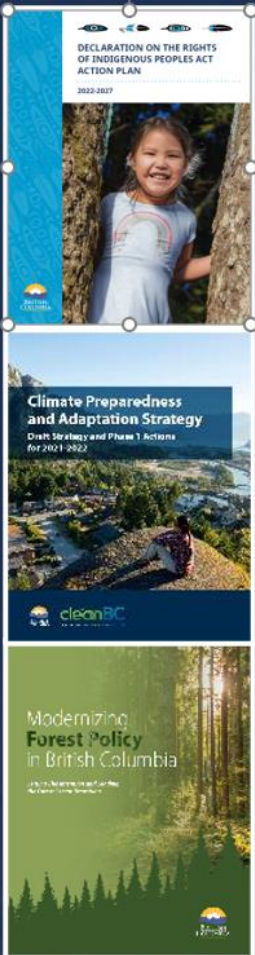

Bulkley Fire Zone Season Summary

- Fires: 20 , 26.7 ha
- 11 human
- 9 lightning
- Nuisance: 7
- Average fire load 2022
- 2023 – watching the drought codes

Cultural and Prescribed Fire – Governments Direction

“Integrate traditional practices and cultural uses of fire into wildfire prevention and land management practices and support the reintroduction of strategized burning.”

“Partner with Indigenous and non-Indigenous communities to expand the use of cultural and prescribed burning to reduce wildfire risks, create resilient natural ecosystems and preserve cultural practices.”

“The ministry will work in cooperation, coordination and collaboration with Indigenous partners and stakeholders to re-integrate prescribed and cultural fire as a core part of our forest management toolkit.”

Climate Change Adaptation Trials

"Primarily, operational trial to investigate the effect of prescribed burning on a range of species and seed lots for climate adaptation."

" Supports government direction objectives for implementing Climate Based Seed Transfer and Climate Change informed Species Selection for climate adapted reforestation."

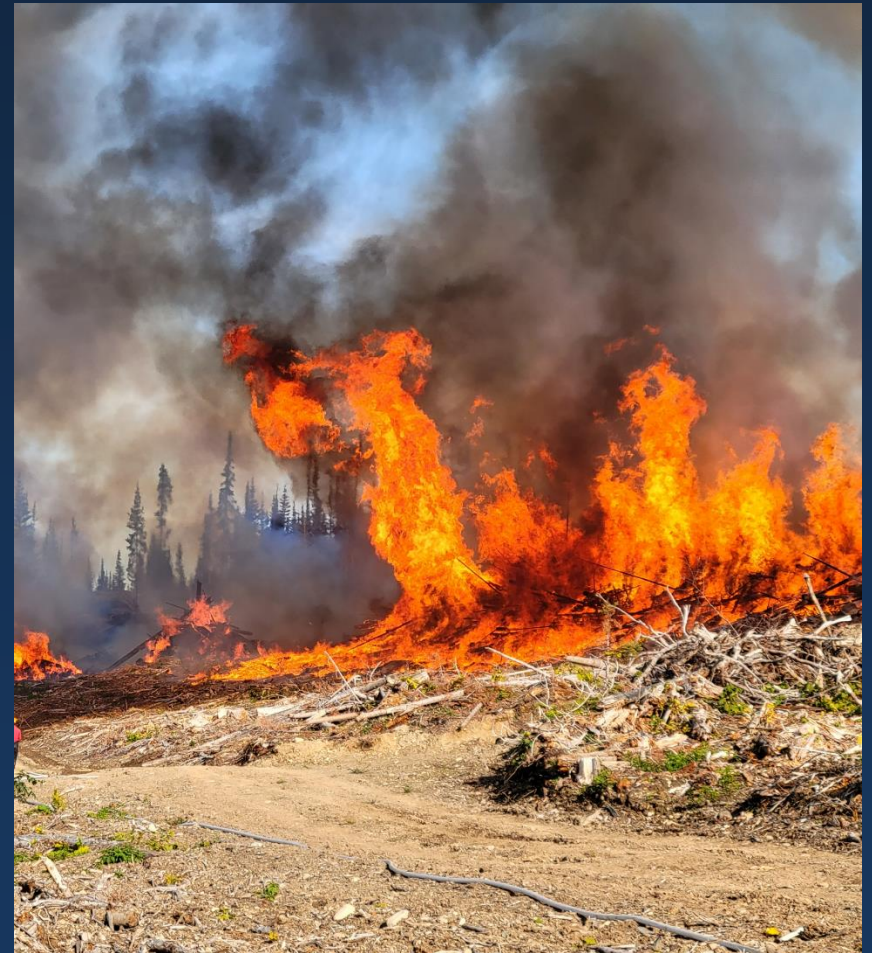

Proponent : Office of the Chief Forester contract support from Larry McCulloch

Partners: PIR, BCWS

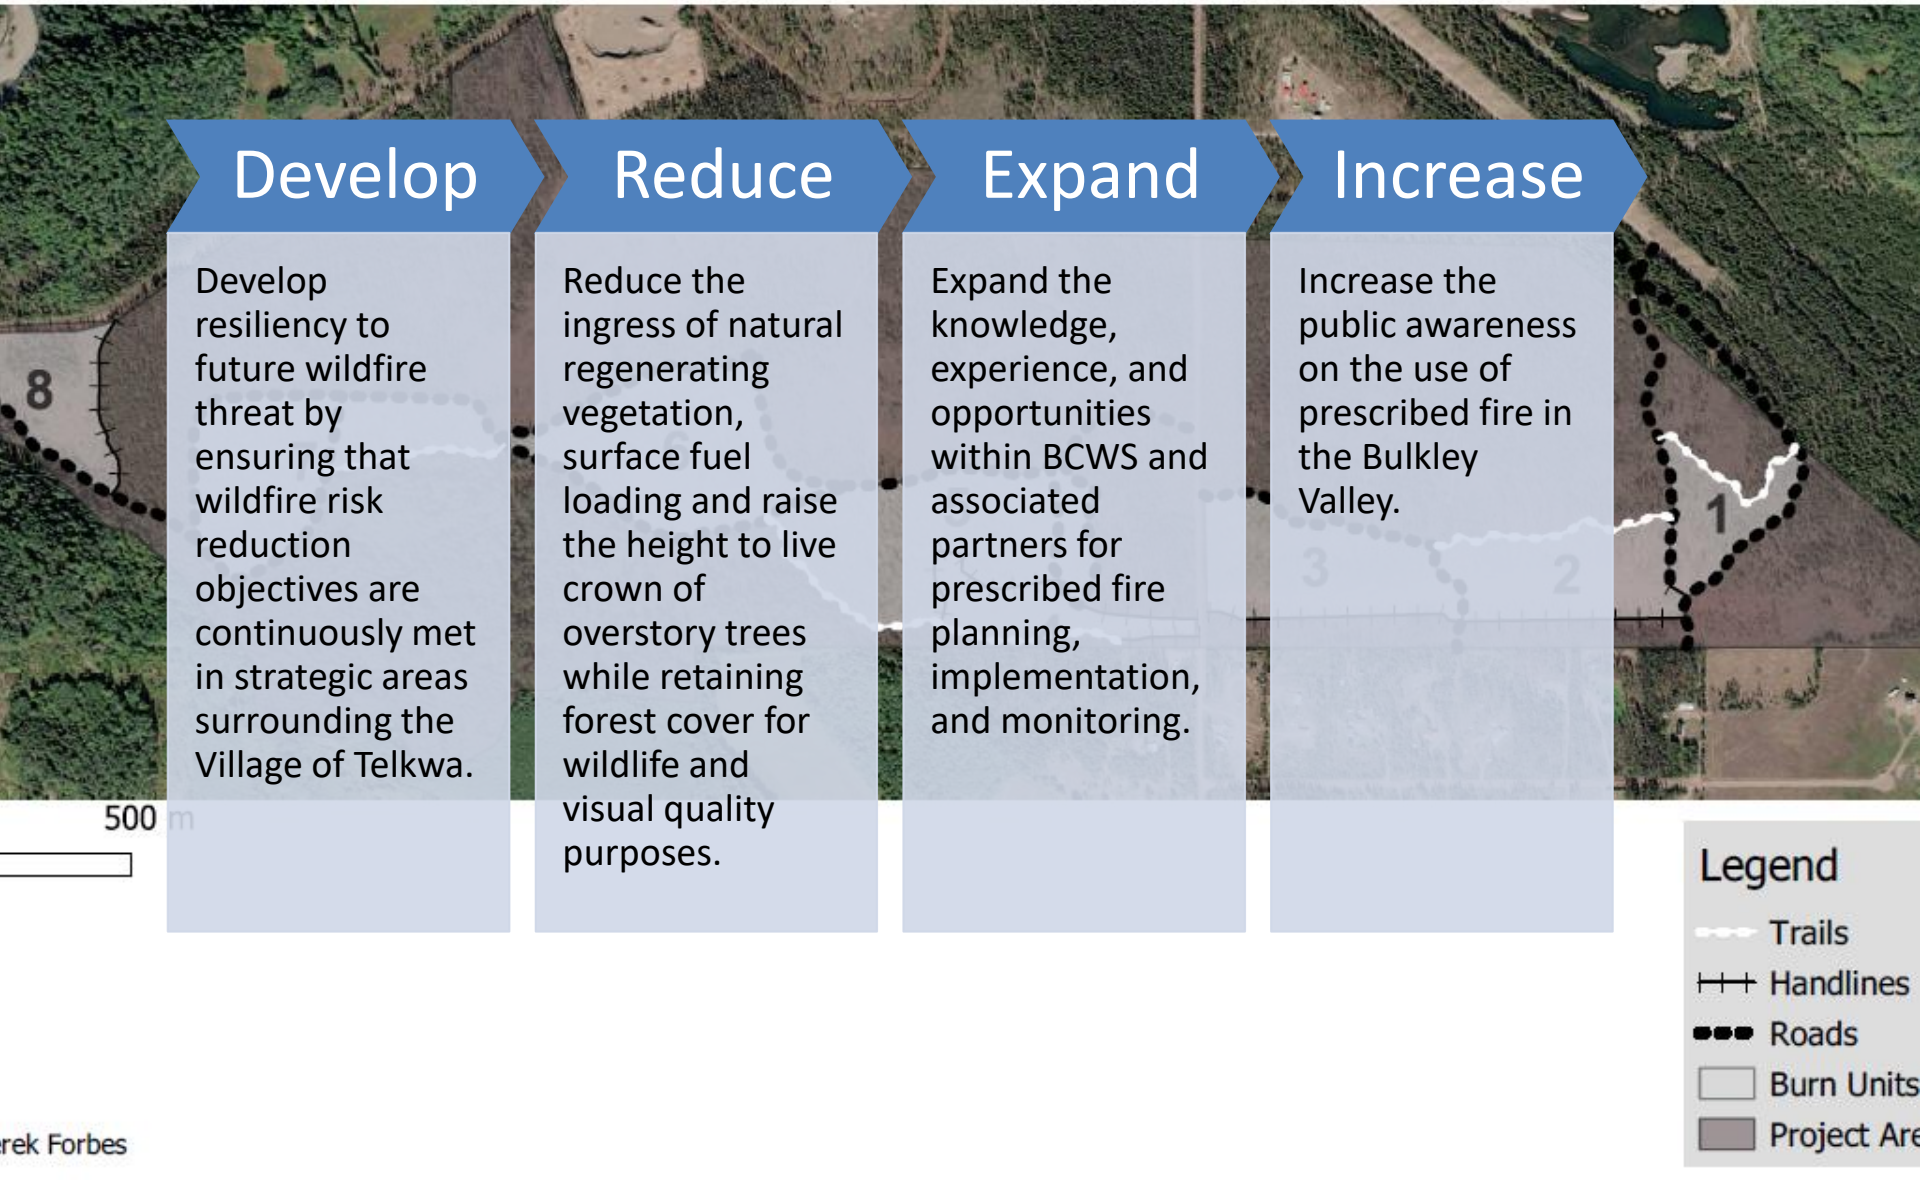

CP 573 and 574 near Fort Babine 2 units totaling 3.9 ha

CP 400-404 Old Fort FSR 1 unit 13.2 ha
