Adapting natural resource management for a changing climate – Participant Workbook

Vernon – October 28th and 29th

Workshop Goals:

- For practitioners to be empowered to employ the lens of climate change to their day to day operations and future projects.
- To ensure practitioners are aware of the most up to date information on adaptation options for a broad range of values.

Purpose of the workshop:

- For practitioners within the natural resource sectors to become familiar with the range of climate change issues and vulnerabilities and to promote the exploration of solutions within their sector.

Target Audience:

- Resource managers across the entire spectrum of values managed by FLNR.

Workshop Objective:

- For participants to learn and share information, tools and guidance for adaptation to climate change for a range of values.

Location:

- Fairfield Inn and Suites, Vernon BC².

Timing:

- 8:30 to 4:30 October 28th and 29th.
