4d SITE INDEX
All SI are shown to the nearest metre referenced at 50 years breast height age. Curves are those of the appropriate leading species. When an accurate SI cannot be obtained from age and height, estimated SI is shown after, or replaces the SI.

4e ESTIMATED SITE INDEX
SI is estimated when suitable SI trees aren=t present, e.g. recently logged, burned, non-forest, etc. The SI source code provides it. Associated fields in the data base are Inventory Type Group and SI Estimated source code.
