

FIA SOWING STANDARDS

Effective April 1, 2003

These standards apply, in addition to the [General FIA Standards \(FS 1001\)](#), to all seedling sowing activities funded under the Forest Investment Account (FIA).

Seedlot Specifications	1	Quality Inspection	2
Stock Specifications	1	Requirement to Notify the Administrator	2
Timing of Sowing	2		

ARTICLE 1: DEFINITIONS

1.1 In this document the following words shall have the following meanings.

“**Seedlings**” means forest tree seedlings.

“**Seedlot**” means a unique identifier of a pool of genetic material as assigned under the Ministry of Forests seedlot numbering system.

“**Sowing**” means sowing seed to produce Seedlings.

“**[Ministry Seedling Stock Specifications](#)**” means the seedling stock specifications posted on the Ministry of Forests’ website at the time of Sowing.

ARTICLE 2: SOWING STANDARDS

Seedlot Specifications

2.1 Seedlots chosen for Sowing must:

- (a) be suitable for the expected planting location;
- (b) meet any Specified criteria;
- (c) meet Forest Practices Legislation requirements for genetic quality; and
- (d) unless otherwise approved by the District Manager, be within the Ministry of Forests seed transfer limits for the expected planting location as specified in the [Seed and Vegetative Material Guidebook](#).

Stock Specifications

2.2 When choosing stock types for Sowing the following must be considered:

- (a) the specifications in any applicable Treatment Plan or Work Plan;
- (b) the tree species being sown;
- (c) the planting site conditions at the expected planting location;
- (d) the vegetative competition; and

- (e) any other relevant factors.

Timing of Sowing

- 2.3 Seed must be sown by a date that would reasonably allow the achievement of [Ministry Seedling Stock Specifications](#) by the date required for lifting.

Limits on Number of Seedlings Ordered

- 2.4 Unless otherwise approved by the FIA Administer, the number of Seedlings ordered for Sowing must not exceed the lesser of that which:
- (a) is required to plant the area expected to be available for planting in the year the Seedlings will be available;
 - (b) is required to plant areas identified as high or medium priority for FIA funding; or
 - (c) can be planted within the expected planting budget in the year the Seedlings will be available.

Choice of Nurseries

- 2.5 Seed must only be sown at nurseries that have previously grown and substantively met the [Ministry Seedling Stock Specifications](#) for the stock type and species being sown.

ARTICLE 3: INSPECTION & NOTIFICATION

Quality Inspection

- 3.1 All Work must be inspected by a person (the "Inspector") who is:
- (a) the Registered Professional Forester (RPF), or operates under the direction of the RPF, who will sign and professionally seal reports for the Work;
 - (b) experienced and competent in conducting inspections of Seedlings;
 - (c) familiar with the Treatment Plans and Work Plans for the Work Areas; and
 - (d) not engaged in the direct conduct of the Sowing operations.
- 3.2 An Inspector must carry out inspections to the extent necessary to ensure all Work is performed to the FIA Standards and Seedlings are likely to meet [Ministry Seedling Stock Specifications](#).

Requirement to Notify the Administrator

- 3.3 A Recipient must immediately notify the Administrator as soon as it becomes known that a substantial number of seed sown have or are likely to fail to meet the [Ministry Seedling Stock Specifications](#).
