

Cruise Rationale – CP 159

December 14, 2015

Blocks: CHM240, CHM240A, CHM241, CHM242, and CHM290

The cruises for the blocks listed above are consistent with their cruise plans. There have been no changes to these blocks since the cruise plans were done. Block areas have been updated to exclude road right of way areas, and to correct some rounding inconsistencies.

Block CHM260

Block CHM260 was re-engineered since the cruise plan was done in 2008. This resulted in a minor area difference from the original block area; however no cruise plots were affected by the re-engineered block boundary. After correspondence with CRFD staff it was deemed the original cruise plots were acceptable to use for the re-engineered block, please see the attached correspondence.
