

| Yellow: Streams outside of fall line boundary |                |             |        |        |
|-----------------------------------------------|----------------|-------------|--------|--------|
| Stream (Reach)                                | Classification | Stream Type | RRZ(m) | RMZ(m) |
| 405-3(1)                                      | S3             | 1           | 60     | 0      |
|                                               |                |             |        |        |

- Avoid parking or servicing equipment within the RRZ
- Field Marking

Blue/White Stripe (S6, S5), Red/White Stripe (S1, S2, S3, S4)
- Riparian Mgmt.

Streams are within WTP or outside of cutblock.
- Road Const.

Remove spanned trees and install culverts concurrent with road construction.

Avoid, where possible, construction of turnouts within RRZ and RMZ.

Fall and yard away where possible

Install appropriate sumps and turnout ditches to minimize sedimentation
- Windthrow Mgmt.

As required by logging plan map or residual stand is expected to remain windfirm.
