Hi Chris,

The cruise data for LAW719 & SKI537 is now also available on the FTP site.

To clarify, access to IAN, BIL and COL blocks can be 4wd from town (Port Clements), however, it is a 3.5+ hr drive one way to these locations if coming from town, so it makes sense to camp out there or bring a truck over and then boat across from Port Clements daily for the duration of the work.

Erica

Hi Chris,

Thank you for the details – that all makes sense.

Please see attached spreadsheet for blocks the District would most benefit from having sampling completed by a contractor. A break down of the blocks and respective samples (identified as “CONTRACT”) and access information can be found on the FREP 2023 CONTRACT tab. Block information can be found here:

https://www.for.gov.bc.ca/ftp/DQC/gov_internal/outgoing/FREP%202023%20contract%20prep/.

While I included the SP map, I strongly feel as though the licensee version of the SP maps should not be publicly advertised as the maps contain cultural information. Is it possible for Branch to generate georeferenced SP maps for Haida Gwaii blocks? FYI - We are still waiting on cruise info for 2 of the 3 BCTS blocks (est. ETA is July 21st).

As discussed, the contractor will not be accompanied by CHN staff unless I am also present. We will endeavour to go to SKI537 with the contractor, as it is a long walk-in and we will plan to complete

the SLR in house for this block.

Please note, while it says I am away from July 7-17 in my autoreply, I will be checking my emails regularly. You're also welcome to text/call my personal cell at 604-356-6026.

Take care and talk soon,
