

FSP Site Plan Amendment Form

Licence	TFL52
Cutting Permit	907
Block	54
<u>Amendment</u> Amendment to correct the Stocking Standards Regime ID. This Amendment is to correct the Stocking Standards Regime ID for TFL52 907-54 from 1041515 to 1041556.	
<u>Rationale</u> This Site Plan Amendment is to correct the Stocking Standard ID applied to TFL52 907-54. The ID has been corrected to 1041556. The Site Plan identified the block as a ESSF wk1/01 site but was accidentally assigned the Stocking Standard ID 1041505 which applies to ESSF wc3/01 sites. The ESSF wc3/01 has lower stocking requirements than the ESSF wk1/01. <ul style="list-style-type: none"> - This amendment conforms to all regulations, acts and standards. - Will not materially affect objectives set out in the original Site Plan. - This minor amendment conforms with the FSP. - It is consistent with the results of any original assessments.
