

FREP Dashboard

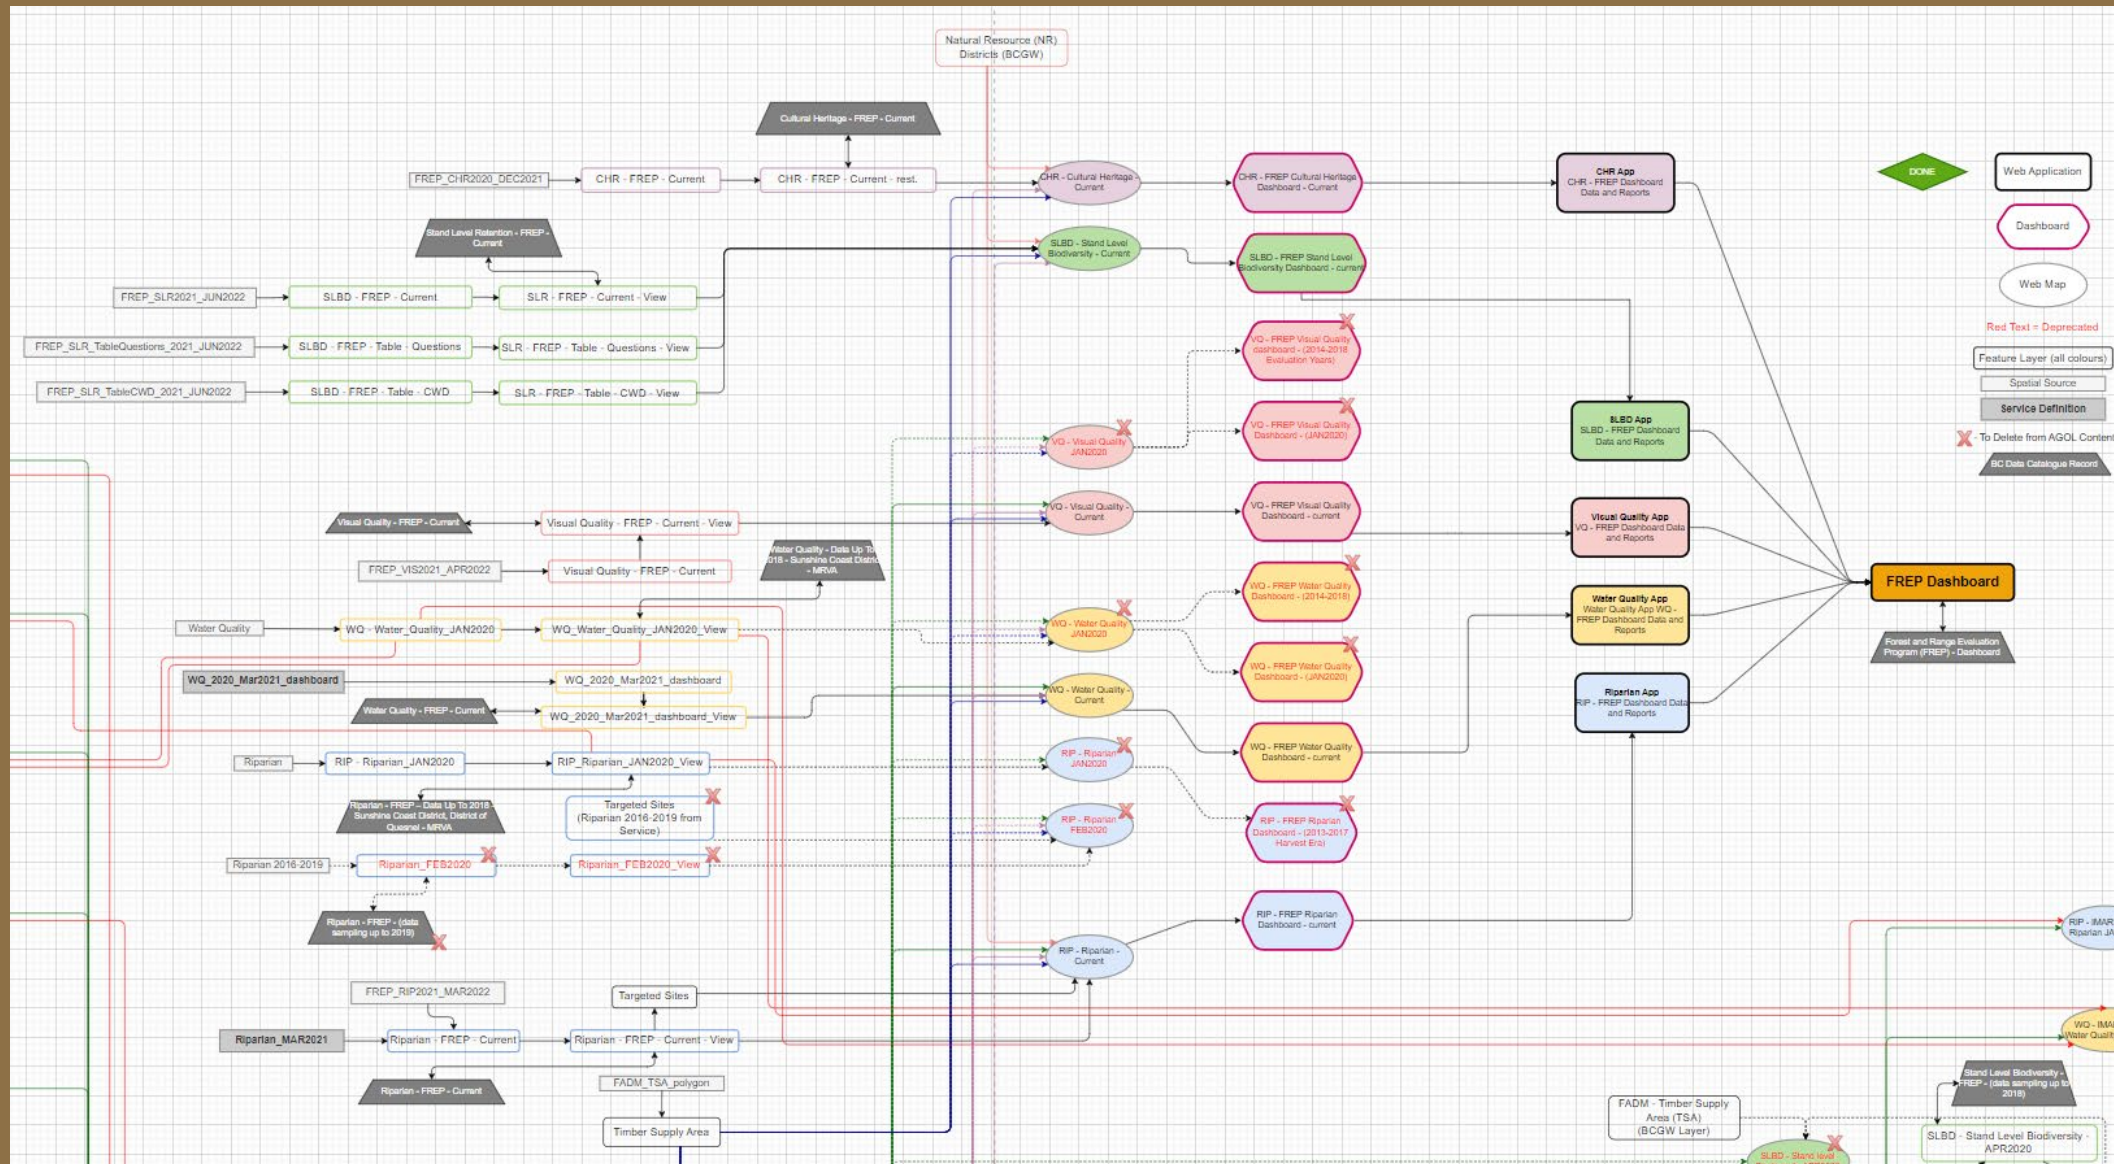

FREP CI – February 28, 2023

Lianne Scott – Geospatial Specialist, WLRS

Update Timeline

- › Scripts are run using python to check for errors, add fields necessary for Dashboard. Output data is staged locally in a geodatabase.
- › Final spatial is published to ArcGIS Online
- › Associated Data Catalogue records are updated

Limitations & FAQs

EXPORT

- Not functional option within Dashboards, currently
- Request dataset from value lead and filter, or request filtered data

PRINT

- Not functional option within Dashboards, currently
- Print screen or take a snip

UPDATES AS DATA IS SUBMITTED

- Data QA/QC process and resourcing makes this not currently possible

DATA FORMAT & CONTENT

- Some gathered information is difficult to convey through the dashboard
- Improvements to protocol

ADD DATA

- Not a current function of the dashboard
- Request overlapping data from value lead
